Section 1B): CUSTOMER JSON FILE DATA DESCRIPTION

Customers.[key].Phone	**string**	**Contains customer's phone number**
Customer.[key].FirstName	**string**	**Contains the customer's first name**
Customer.[key].LastName	**string**	**Contains the customer's last name**
Customer.[key].RewardsPoints	**int**	**Contains the number of rewards points a customer has**
Customer.[key].CustomerId	**string**	**Contains the customer ID that is unique to each individual customer**
Customer.[key].Orders.Date	**string**	**Contains the date at which the transaction was held**
Customer.[key].Orders.Tax	**float**	**Contains the tax of the transaction**
Customer.[key].Orders.[key].Subtotal	**float**	**Contains the subtotal of the transaction**

Customers.[key].Phone	**string**	**Contains customer's phone number**
Customer.[key].Orders.[key].Total	**float**	**Contains the total of the transaction**
Customer.[key].Orders.[key].PaymentMethod	**string**	**Contains the payment method of the customer**
Customer.[key].Orders.[key].OrderedItems.[key].Quantity	**int**	**Contains the quantity of drinks ordered**
Customer.[key].Orders.[key].OrderedItems.[key].DrinkName	**string**	**Contains the name of the drink that is on the order**
Customer.[key].Orders.[key].OrderedItems.[key].Customizations.[key]	**string**	**Contains the various drink customizations a customer can do**
